INDEPENDENT AUDITOR'S REPORT

To the Members of the School Board
Brookline School District
Brookline, New Hampshire

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Brookline School District, as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the School District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Opinions

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Brookline School District as of June 30, 2015, and the respective changes in financial position thereof for

the year then ended in accordance with accounting principles generally accepted in the United States of America.

Change in Accounting Principle

As discussed in Note I.B.5. to the financial statements, in fiscal year 2015, the School District adopted new accounting guidance regarding the accounting and reporting for pensions. Our opinion is not modified with respect to this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis, and the OPEB and pension schedules, on pages 3-8 and 35-38 be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Other information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the Brookline School District's basic financial statements. The combining and individual fund schedules are presented for purposes of additional analysis and are not a required part of the basic financial statements.

The combining and individual fund schedules are the responsibility of management and were derived from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States of America. In our opinion, the combining and individual fund schedules are fairly stated, in all material respects, in relation to the basic financial statements as a whole.

**BROOKLINE SCHOOL DISTRICT
MANAGEMENT DISCUSSION AND ANALYSIS
FISCAL YEAR ENDING JUNE 30, 2015**

This section of the Brookline School District annual financial report presents our discussion and analysis of the district's financial performance during the fiscal year that ended June 30, 2015. Responsibility for the accuracy of the data, and the completeness and fairness of this presentation (including all disclosures) rests with management. To the best of our knowledge and belief, the data contained herein is accurate in all material performance as a whole. With this in mind, please also refer to the district's financial statements, which immediately follow this section. The MDA is an element of required supplementary information specified in the Governmental Accounting Standards Board (GASB) Statement No. 34 – Basic Financial Statements – and Management's Discussion and Analysis – for State and Local Governments issued in June 1999.

The District administration is responsible for establishing and accounting and internal control structure designed to ensure that the physical, data, informational, intellectual, and human resource assets of the District are protected from loss, theft and misuse, and to ensure that adequate accounting information is maintained and reported in conformity with generally accepted accounting principles (GAAP). Management also strives to ensure these assets are put to good and effective use. The internal control structure is designed to provide reasonable assurance that these objectives are attained.

OVERVIEW OF THE FINANCIAL STATEMENTS

This annual report consists of three parts: management's discussion and analysis (this section), the basic financial statements, and required supplementary information. The basic financial statements include two kinds of statements that present different views of the district:

1. The first two basic financial statements provide both short-term and long-term information about the district's overall financial status.
2. The remaining basic financial statements are fund financial statements that focus on individual parts of the district, reporting the district's operations in more detail than the district-wide statements. The basic financial statements also include notes that explain some of the information in the financial statements and provide more detailed data. The basic financial statements are followed by a section of required supplementary information that further explains and supports the financial statements with a comparison of the district's budget for the year. The remainder of this overview section of management's discussion and analysis highlights the structure and contents of each of the statements.

DISTRICT-WIDE STATEMENTS

The district-wide statements report information about the district as a whole. The statement of net position includes all of the district's assets and liabilities, except for capital assets. All of the current year's revenues and expense are accounted for in the statement of activities regardless of when cash is received or paid. Net position – the difference between the district's assets and liabilities – is one way

**BROOKLINE SCHOOL DISTRICT
MANAGEMENT DISCUSSION AND ANALYSIS
FISCAL YEAR ENDING JUNE 30, 2015**

to measure the district's financial health or position. The district-wide statements present and aggregate view of the finances of the school district by answering the question, "How did the school district do financially during the 2014-15 school year?" These statements report all assets and liabilities using the accrual basis of accounting used by most private-sector enterprises. The accrual basis takes into account all of the district's current-year revenues and expenses regardless of when they were paid or received.

In the district-wide financial statements the district's activities are listed as governmental activities, which includes most of the district's basic service, such as regular and special education, transportation, and administration. Property taxes and state revenue finance most of the activities.

FUND FINANCIAL STATEMENTS

The fund financial statements provide more detailed information about the district's most significant funds – not the district as a whole. Funds are accounting devices the district uses to keep track of specific sources of funding and spending on particular programs. Some funds are required by state law and by bond covenants. The district establishes other funds to control and manage money for particular purposes (like repaying long-term debts) or to show that it is properly using certain revenues (like federal grants).

The district has two types of funds:

- Governmental funds – Most of the district's basic services are included in governmental funds, which generally focus on (1) how cash (and other financial assets that can be readily converted to cash) flows in and out and (2) the balances left at year end that are available for spending. Consequently, the governmental funds statements provide a detailed short-term view that helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the district's programs. This information does not encompass the additional long-term focus of the district-wide statements. We provide additional information with the governmental funds statements that explain the relationship (or differences) between them. An annual appropriation budget is adopted for governmental funds. A budgetary comparison has been provided for the General and Grant funds to demonstrate compliance with this budget.
- Fiduciary Funds – The district is the trustee, or fiduciary, for assets that belong to others, such as the student activities funds. The district is responsible for ensuring that the assets reported in these funds are used only for their intended purposes and by those to whom the assets belong. All of the district's fiduciary activities are reported in a separate statement of fiduciary net position and a statement of changes in the fiduciary net position. These activities are not included in the district-wide financial statements because the district cannot use these assets to finance its operations.

Notes to the Basic Financial Statements

The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Government-Wide Financial Analysis

The School District implemented GASB Statement No. 68 this year. With the new reporting change, the School District is allocated its proportionate share of the New Hampshire Retirement System's net pension liability, deferred outflows of resources, deferred inflows of resources, and pension expense. A restatement to record the effects of the new reporting guidance decreased beginning net position by \$5,282,528. Decisions regarding the allocations are made by the administrators of the NHRS, not by the School District's management, and are audited by the plan auditors.

Net Position - Ending	4,901,267	27,113	4,874,154	17977%

Specific areas of variance are evidenced above in the change in net position. Some larger variances are due to the following:

Revenues – Charges for Services were up based on the increase in kindergarten tuition. Operating grants and contributions were down due to less in IDEA and REAP revenue. The decrease under

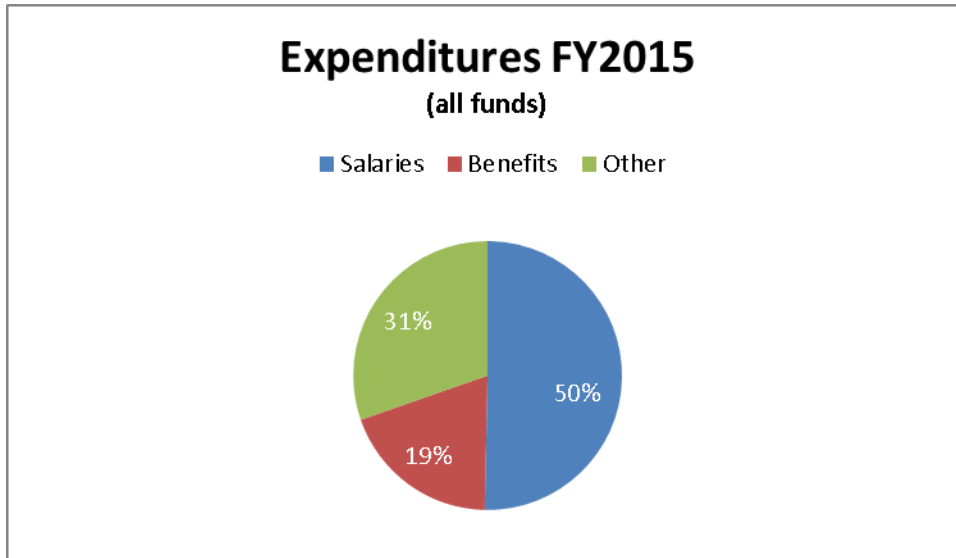

**BROOKLINE SCHOOL DISTRICT
MANAGEMENT DISCUSSION AND ANALYSIS
FISCAL YEAR ENDING JUNE 30, 2015**

“Miscellaneous” revenues was driven by lower payments from the Local Government Center as a result of a mandated return of surplus funds to member districts.

Program Expenses – Under the category of “Other”, this variance was driven by decreases in professional development, equipment purchases, a decrease in enrollments in the district provided health coverage and other smaller reductions in benefits. “Student Support” and “Student Transportation” costs decreased as a significant portion of special education costs moved to the Hollis Brookline Middle School.

Brookline School District Activities

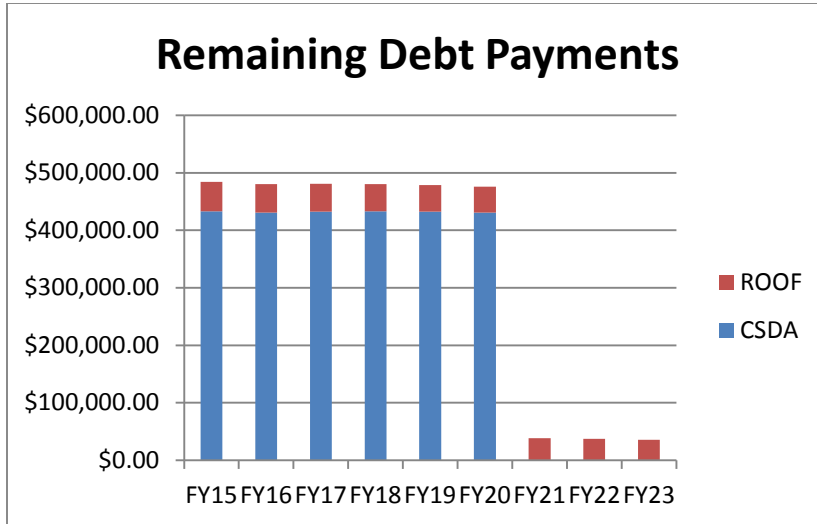

The district’s expenses are predominately salaries and benefits which are illustrated below. "Other" expenses account for contracted services, transportation, operation & maintenance of plant, debt service, and general operational materials.

DEBT ADMINISTRATION

The Brookline School District carries debt for the construction of Captain Samuel Douglas Academy and the roof repair of the same.

OTHER DISCUSSION

The district's financial status is sound. Being that the majority of cost is associated to salary and benefits the budget is rather predictable from year to year. Alternative methods to provide access to reserve/contingency funds should be explored to ensure availability for funds should revenues fall below estimates or significant expenses arise throughout the course of the year.

This financial report is designed to provide our citizens, taxpayers, customers, and investors and creditors with a general overview of the district's finances and to demonstrate the district's accountability for the money it receives. NOTES TO THE FINANCIAL STATEMENTS

**BROOKLINE SCHOOL DISTRICT
NOTES TO THE FINANCIAL STATEMENTS
AS OF AND FOR THE FISCAL YEAR ENDED
JUNE 30, 2015**

I. Summary of Significant Accounting Principles

I.A. Introduction

The accounting and reporting framework and the more significant accounting principles and practices of the Brookline School District (the School District) are discussed in subsequent sections of this note. The remainder of the notes is organized to provide explanations, including required disclosures, of the School District's financial activities for the fiscal year ended June 30, 2015.

I.B. Financial Reporting Entity – Basis of Presentation

I.B.1. Entity Defined

The Brookline School District is a municipal corporation governed by a school board consisting of five members elected by the voters. These financial statements present the financial position and activity of the primary government. Component units are organizations for which the primary government is financially accountable, or other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the financial reporting entity's financial statements to be misleading or incomplete. Based on the stated criteria, the School District's financial statements do not include any component units.

I.B.2. Government-Wide and Fund Financial Statements

Government-Wide Financial Statements

The government-wide financial statements include the statement of net position and the statement of activities. These statements report financial information for the School District as a whole, excluding fiduciary activities. Individual funds are not displayed.

The statement of activities reports the expenses of a given function offset by program revenues directly connected with the functional program. A function is an assembly of similar activities and may include portions of a fund or summarize more than one fund to capture the expenses and program revenues associated with a distinct functional activity. Program revenues include: (1) charges for services which report tuition, fees, and other charges for the School District's services; (2) operating grants and contributions, which finance annual operating activities including restricted investment income; and (3) capital grants and contributions which finance the acquisition, construction, or rehabilitation of capital assets. These revenues are subject to externally imposed restrictions to these program uses. The school district assessment from the town, unrestricted state aid and revenue from other sources not properly included with program revenues are reported as general revenues.

Fund Financial Statements

Fund financial statements are provided for governmental and fiduciary funds. Major individual, governmental funds are reported in separate columns with a composite column for nonmajor funds.

I.B.3. *Measurement Focus, Basis of Accounting and Financial Statement Presentation*

The financial statements of the School District are prepared in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP). The School District's reporting entity applies all relevant Governmental Accounting Standards Board (GASB) pronouncements.

The government-wide statements report using the economic resources measurement focus and the accrual basis of accounting generally including the reclassification or elimination of internal activity (between or within funds). Reimbursements are reported as reductions to expenses. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of the related cash flows. Grants are recognized when grantor eligibility requirements are met. Fiduciary fund financial statements also report using this same basis of accounting. The agency funds are custodial in nature and do not measure results of operations.

Governmental fund financial statements report using the current financial resources measurement focus and the modified accrual basis of accounting. Revenues are recognized when they are both measurable and available. Available means collectible within the current period or soon enough thereafter to pay current liabilities. The School District considers revenues to be available if they are collected within 60 days of the end of the fiscal year. Expenditures are recorded when the related fund liability is incurred, except for general obligation bond principal and interest which are reported as expenditures in the year due.

Major revenues susceptible to accrual are the school district assessment from the town, tuition, investment income and federal and state grants. In general, other revenues are recognized when cash is received.

I.B.4. *Fund Types and Major Funds*

Governmental Funds

The School District reports the following major governmental funds:

General Fund – Reports as the primary fund of the School District. This fund is used to account for all financial resources not reported in other funds.

Grants Fund – Reports as a special revenue fund and accounts for the revenues and expenditures of the School District's federal grant programs.

**BROOKLINE SCHOOL DISTRICT
NOTES TO THE FINANCIAL STATEMENTS
AS OF AND FOR THE FISCAL YEAR ENDED
JUNE 30, 2015**

The School District also reports four nonmajor governmental funds: food service, other special revenue, capital project, and permanent.

Fiduciary Funds

The School District reports the following type of fiduciary fund:

Agency Funds – Account for fiduciary assets held by the School District in a custodial capacity as an agent on behalf of others. The School District’s agency funds are used to account for student activities.

I.B.5. *Change in Accounting Principle*

The School District adopted the provisions of GASB Statement No. 68, *Accounting and Financial Reporting for Pensions*, for the year ended June 30, 2015. This resulted in the inclusion of pension related liability and deferred inflows and outflows of resources in governmental activities. The prior year’s net position was restated as shown in Note III.E.

I.C. *Assets, Liabilities, and Net Position or Fund Equity*

I.C.1. *Cash and Investments*

The laws of the State of New Hampshire require that the School District’s treasurer have custody of all monies belonging to the School District and pay out the same only upon orders of the School Board. The treasurer shall deposit all monies in participation units in the public deposit investment pool established pursuant to N.H. RSA 383:22 or in solvent banks in the state. Funds may be deposited in banks outside the state if such banks pledge or deliver to a third party custodial bank or the Federal Reserve Bank, collateral security for such deposits, United States government or government agency obligations, or obligations of the State of New Hampshire in value at least equal to the amount of the deposit in each case.

Investments are stated at fair value based on quoted market prices.

New Hampshire law authorizes the School District to invest in obligations of the United States government; the public deposit investment pool established pursuant to RSA 383:22; savings bank deposits; prime bankers’ acceptances; or certificates of deposit and repurchase agreements of banks incorporated under the laws of the State of New Hampshire or in banks recognized by the state treasurer.

Any person who directly or indirectly receives any such funds or monies for deposit or for investment in securities of any kind shall, prior to acceptance of such funds, make available at the time of such deposit or investment an option to have such funds secured by collateral having a value at least equal to the amount of such funds. Such collateral shall be segregated for the exclusive benefit of the School

District. Only securities defined by the bank commissioner as provided by rules adopted pursuant to RSA 386:57 shall be eligible to be pledged as collateral.

I.C.2. Inventory and Prepaid Items

Inventory is valued at cost using the first-in/first-out (FIFO) method. The inventory of governmental funds is recorded as expenditures when consumed rather than when purchased.

Prepaid items are payments to vendors that benefit future reporting periods and are reported on the consumption basis. Such items are similarly reported in government-wide and fund financial statements.

I.C.3. Capital Assets and Depreciation

The School District's capital assets with useful lives of more than one year are stated at historical cost and reported in the government-wide financial statements. Donated assets are stated at fair value on the date donated. The School District capitalizes assets with cost of \$10,000 or more and an estimated useful life of one year or more as purchase and construction outlays occur. The costs of normal maintenance and repairs that do not add to the asset value or materially extend useful lives are not capitalized. Capital assets are depreciated using the straight-line method. When capital assets are disposed of, the cost and applicable accumulated depreciation are removed from the respective accounts, and the resulting gain or loss is recorded in operations. Estimated useful lives, in years, for depreciable assets are as follow:

	<u>Years</u>
Land improvements	20
Buildings and building improvements	50-115
Machinery, equipment and vehicles	15-20

I.C.4. Deferred Outflows/Inflows of Resources

Although certain revenues and expenses are measurable, they are not available or recognized, because the activity represents a consumption or acquisition of net position that applies to a future period and so will not be recognized as an outflow or inflow of resources until then.

Deferred inflows of resources in the governmental fund financial statements represent parent deposits for the 2016 kindergarten program; and donated commodities that are held in inventory to be used in the subsequent year. Deferred outflows and inflows of resources in the Statement of Net Position consist of resources related to pensions that will be recognized in a subsequent period.

**BROOKLINE SCHOOL DISTRICT
NOTES TO THE FINANCIAL STATEMENTS
AS OF AND FOR THE FISCAL YEAR ENDED
JUNE 30, 2015**

I.C.5. *Long-Term Debt*

In the government-wide financial statements, outstanding debt is reported as liabilities. The balance of long-term debt is not reported in the governmental funds.

I.C.6. *Compensated Absences*

Full-time, permanent employees are granted vacation benefits in varying amounts to specified maximums. Sick leave accrues to full-time, permanent employees to specified maximums. Support staff employees are entitled to a portion of their sick leave upon termination.

Compensated absences are reported as accrued in the government-wide financial statements. Governmental funds report only matured compensated absences payable to currently terminated employees which are included in wages and benefits expenditures.

I.C.7. *Termination Benefits*

Teachers are entitled to a retirement incentive after meeting certain employment requirements. Termination benefits are reported as accrued in the government-wide financial statements. Governmental funds report only matured termination benefits payable to currently terminated employees which are included in wages and benefits expenditures.

I.C.8. *Equity*

The government-wide statement of net position reports net position in the following components:

- Net investment in capital assets, which is computed as the total capital assets less accumulated depreciation, net of outstanding debt used to acquire those assets.
- Restricted for special purposes, which consists of the expendable and nonexpendable portions of endowments held by the Town of Brookline Trustees of Trust Funds for School District purposes.
- Unrestricted, which consists of the remaining balance of net position.

The governmental funds report the following components of fund balance:

- Nonspendable, which represents the balance of inventory reported in the Food Service Fund; expenditures paid in advance for contract services, staff courses and summer events reported

**BROOKLINE SCHOOL DISTRICT
NOTES TO THE FINANCIAL STATEMENTS
AS OF AND FOR THE FISCAL YEAR ENDED

in the General Fund; and the principal portion of endowments for school purposes held in the Town of Brookline Trust Funds.

- Restricted, which represents the expendable portion of the endowment for school purposes held in the Town of Brookline Trust Funds.
- Committed, which represents the balance of the expendable trust funds, established by the School District Meeting for support services (maintenance), whose purpose can only be changed by vote of the same, and the balances of special revenue and capital project funds.
- Assigned, which represents encumbrances for professional development and a new gym floor, authorized by approved purchase orders.
- Unassigned, which represents fund balance in the General Fund in excess of that classified as nonspendable, restricted, committed or assigned.

I.C.9. *Estimates*

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results may differ from those estimates.

II. Stewardship, Compliance and Accountability

II.A. Budgetary Information

Annual budgets are adopted on a basis consistent with generally accepted accounting principles for all major governmental funds. Unless encumbered, all appropriations lapse at year-end. The School District is required to use beginning unassigned fund balance to balance the budget. In the fiscal year 2015, \$21,893 of the fund balance from the fiscal year 2014 was used.

Encumbrance accounting is employed by the governmental funds. Encumbrances (e.g., purchase orders, contracts) outstanding at year-end are reported as assigned fund balance and do not constitute expenditures or liabilities because the assignments will be added to the appropriations voted for the subsequent year.

Revenues are budgeted by source. Expenditures are budgeted by functions as follow: instruction, student support, instructional staff, general administration, executive administration, school administration, operation and maintenance of plant, student transportation, other support services, non-instructional services, and debt service. Management can transfer appropriations among budget

line items as necessary, but the total expenditures cannot legally exceed the total appropriations unless permission is received from the Commissioner of Education.

III. Detailed Notes on Funds and Government-Wide Statements

III.A. Assets

III.A.1. Receivables

Significant receivables consist of reimbursements and intergovernmental amounts arising from Medicaid, grants, reimbursements from other school districts for shared services and the trust funds being in the custody of the Town of Brookline trustees of trust funds

Receivables are recorded on the School District’s financial statements to the extent that the amounts are determined to be material and substantiated not only by supporting documentation, but also by a reasonable, systematic method of determining their existence, completeness, valuation and collectability.

III.C. Balances and Transfers – Payments Within the Reporting Entity

III.C.1. *Receivables and Payables*

Generally, outstanding balances between funds reported as “interfund receivables/payables” include outstanding charges by one fund to another for goods or services, subsidy commitments outstanding at year-end, or other miscellaneous amounts. Activity between funds that is representative of lending/borrowing arrangements outstanding at the end of the fiscal year is also reported as “interfund receivables/payables.”

The \$81,733 due to the General Fund represents an overdraft of pooled cash from the Grants Fund.

III.C.2. *Transfers*

Transfers within the reporting entity are for the purpose of distribution of income earned on Permanent Funds in the amount of \$1,267. The government-wide statement of activities eliminates transfers reported within the governmental activities columns.

IV. Other Information

IV.A. Risk Management

The School District's risk management activities are reported with governmental activities and recorded in the general fund. During the fiscal year, the School District was a member of the Local Government Center Property-Liability Trust, Inc., which is considered a public entity risk pool, currently operating as a common risk management and insurance program for member governmental entities.

Local Government Center Property-Liability Trust, Inc. (the Trust) – This Trust is organized to provide certain property and liability protection to member towns, cities, and other qualified political subdivisions of New Hampshire. As a member of the Trust, the School District shares in contributing to the cost of, and receiving benefits from, a self-insured pooled risk management program. The membership and coverage run from July 1 to June 30. The Trust maintains a self-insured retention above which it purchases reinsurance and excess insurance.

Contributions paid for fiscal year 2015 to be recorded as an insurance expenditure/expense totaled \$14,070. There were no unpaid contributions for the year ended June 30, 2015. The School District also paid \$29,684 for workers' compensation and \$12,489 for unemployment compensation for the fiscal year. The trust agreement permits the Trust to make additional assessments to members should there be a deficiency in trust assets to meet its liabilities. At this time, the Trust foresees no likelihood of any additional assessments for past years.

IV.B. Retirement Pensions

The New Hampshire Retirement System (NHRS) is a multiple-employer, cost-sharing, contributory public employee defined benefit plan qualified under section 401(a) of the Internal Revenue Code, and funded through a trust which is exempt from tax under Internal Revenue Code section 501(a). The NHRS provides service, disability, death and vested retirement benefits for employees and their beneficiaries. The New Hampshire Legislature establishes the provisions for benefits and contributions. The NHRS issues a separate financial report that is available at www.nhrs.org or by contacting the NHRS at 54 Regional Drive, Concord, NH 03301.

Both the members and the School District make contributions to the NHRS. Member rates of contribution are set by the Legislature. Employer rates are determined by the NHRS trustees based on an actuarial valuation. The rate of contribution is 7% of gross earnings for all employees. The rates of contribution from the School District were 14.16% for teachers and 10.77% for other employees. Employer contributions from the School District during the fiscal years 2013, 2014 and 2015 were \$406,743, \$503,413 and \$505,609, respectively. The amounts are paid on a monthly basis as due.

Pension Liabilities, Pension Expense, and Deferred Outflows and Inflows of Resources Related to Pensions

At June 30, 2015, the School District reported a liability of \$4,969,879 for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2014, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of the date. The School District's proportion of the net pension liability was based on a projection of the School District's long-term share of contributions to the pension plan relative to the projected contributions of all participating municipalities and school districts, actuarially determined. As of June 30, 2014, the School District's proportion was 0.1324%, which was an increase of 0.0004% from its proportion measured as of June 30, 2013.

For the year ended June 30, 2015, the School District recognized pension expense of \$339,992. At June 30, 2015, the School District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred Outflows of Resources	Deferred Inflows of Resources
	<u> </u>	<u> </u>
Changes in proportion and differences between employer contributions and proportionate share of contributions	\$ 13,949	\$ -
Net differences between projected and actual earnings on pension plan investments	-	635,900
School District contributions subsequent to the measurement date	505,609	-
	<u>\$ 519,558</u>	<u>\$ 635,900</u>

The School District reported \$505,609 as deferred outflows of resources related to pensions resulting from School District contributions subsequent to the measurement date, which will be recognized as a reduction of the net pension liability in the year ending June 30, 2016.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense as follow:

Actuarial Assumptions

The total pension liability in the June 30, 2014 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.75%
Salary increases	5.8% average, including inflation

Mortality rates were based on the RP-2000 Mortality Table, projected to 2020 with Scale AA. The table includes a margin of 15% for men and 17% for women for mortality improvements.

Sensitivity of the School District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate

The following presents the School District's proportionate share of the net pension liability calculated using the discount rate of 7.75%, as well as what the School District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one percentage point lower (6.75%) or one percentage point higher (8.75%) than the current rate.

	1% Decrease (6.75%)	Current Discount Rate (7.75%)	1% Increase (8.75%)
School District's proportionate share of net pension liability	\$ 6,546,140	\$ 4,969,879	\$ 3,640,068

Other actuarial assumptions, as well as detailed information about the pension plan's fiduciary net position, is available in the separately issued NHRS report.

IV.C. Contingent Liabilities

The School District has received federal and state grants for specific purposes that are subject to review and possible audit by the grantor or pass-through agencies. Any such audit may result in a requirement to reimburse the grantor agency for costs disallowed. The School District feels that the chance of disallowance is unlikely, and if it should occur, the amount would not be material.

IV.D. Other Postemployment Benefits

Plan Description

Benefits provided to retirees follow New Hampshire Revised Statutes Annotated 100-A:50 (Medical Insurance Coverage). This statute states that the School District "shall permit its employees upon retirement to continue to participate in the same medical insurance or health care group or plan as its

**BROOKLINE SCHOOL DISTRICT
NOTES TO THE FINANCIAL STATEMENTS

JUNE 30, 2015**

active employees. Retired employees shall be deemed to be part of the same group as active employees of the same employer for purposes of determining medical insurance premiums. Coverage for spouses, other family members and beneficiaries of retirees shall also be permitted to the extent that coverage is provided for the spouses, other family members and beneficiaries of active employees . . ." In addition, the statute states "Each political subdivision, as employer, may elect to pay the full cost of group medical insurance or health care coverage for its retirees, or may require each retiree to pay any part or all of the cost of the retiree's participation."

Since the same premiums are charged to active employees and retirees, and the School District is unable to obtain age-adjusted premium information for the retirees, GASB 45 requires the School District to calculate age-adjusted premiums for the purpose of projecting future benefits for retirees.

The School District offers postemployment medical benefits to School District retirees and their covered dependents. The School District offers coverage as follows:

- Employees hired before July 1, 2011: retire after (1) attaining age 60 or (2) attaining age 50 with 10 or more years of service or (3) age plus service is at least 70 with 20 or more years of service
- Employees hired on or after July 1, 2011: retire after (1) attaining age 65 or (2) attaining age 60 with 30 or more years of service

Medical coverage continues to the spouse after the death of the retiree provided the spouse makes the required contributions.

Currently, there are 118 active and retired employees that receive health benefits from the School District. The School District recognizes the cost of providing health insurance annually as expenditures in the General Fund as payments are made. For the year ended June 30, 2015, the School District recognized nothing for its share of insurance premiums for currently enrolled retirees.

The School District has obtained a valuation report as of July 1, 2013 which indicated that the total liability for other postemployment benefits is \$783,032 (\$7,029 related to retirees and \$776,003 related to employees).

The School District's annual other post-employment benefit (OPEB) cost (expense) for its plan is calculated based on the annual required contribution of the employer (ARC), an amount determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover normal cost each year and to amortize any unfunded liabilities (or funding excess) over a period not to exceed thirty years.

The Schedule of Funding Progress, the Schedule of the School District's Proportionate Share of the Net Pension Liability and the Schedule of School District Contributions are meant to present related information for ten years. Because this is the second year that the School District has reported the OPEB schedule, and the first year that the School District has adopted GASB Statement No. 68 and presented this information, only three and two years, respectively, are reported. An additional year's information will be added each year until there are ten years shown.

INDEPENDENT AUDITOR'S COMMUNICATION TO MANAGEMENT

To the Members of the School Board
Brookline School District
Brookline, New Hampshire

In planning and performing our audit of the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Brookline School District as of and for the year ended June 30, 2015, in accordance with auditing standards generally accepted in the United States of America, we considered the Brookline School District's internal control over financial reporting (internal control) as a basis for designing audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the School District's internal control. Accordingly, we do not express an opinion on the effectiveness of the School District's internal control.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct, misstatements on a timely basis. A material weakness is a deficiency, or a combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented, or detected and corrected, on a timely basis. We did not identify any deficiencies in internal control that we consider to be material weaknesses.

Our consideration of internal control was for the limited purpose described in the first paragraph and was not designed to identify all deficiencies in internal control that might be material weaknesses. Given these limitations during our audit, we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

This communication is intended solely for the information and use of management, the school board, and others within the Brookline School District, and is not intended to be, and should not be, used by anyone other than these specified parties.
